

## TR6 PRO 110V

Steam cleaning possesses a number of benefits over more traditional cleaning methods. Cost, hygiene and environmental factors are amongst some of the benefits associated with steam cleaning. Using dry-steam will completely sanitise surfaces, destroying microorganisms such as bacteria, mites, and mildew. The Edge TR6 Pro steam machine will do just this, with an operating temperature of 155°C which is well above the sanitised. It is a machine with unlimited autonomy of use, which allows the user to always have full control of the cleaning operations thanks to the practical handle with integrated electronic controls and a wide range of dedicated accessories. The possibility of adjusting the steam jet gives TR6 Pro a wide versatility of use by letting the users to clean effectively multiple surfaces. The TR6 Pro uses very little water and no harsh chemicals, so we can say without exception that the TR6 Pro is an extremely environmentally friendly machine.

### Product features;

- Stainless Steel Boiler
- Automatic Safety Check System
- Safety Valve
- Digital indicator of boiler temperature, steam ready and water lack
- Continuous Water Fill
- Ergonomically Designed
- Power @ Handle 6 Volt
- Air Purification
- HACCP Compliance

### Application;

Bathroom / Shower / Kitchen  
Ovens / Windows / Floors  
Doors / Carpets / Sofas

### Standard equipment

	TR6 Pro
CODE	<b>2073</b>
